

DEVELOP A PYTHON SCRIPT

Date	30-10-2022
Team ID	PNT2022TMID38017
Project Name	Project – IoT based safety gadget for child safety monitoring and notification
Maximum Marks	4 Marks
Submitted By	X Jasmine Jenifer Mary L Blessy Evangelin M Ayesha Munawar S Ansul Jafera

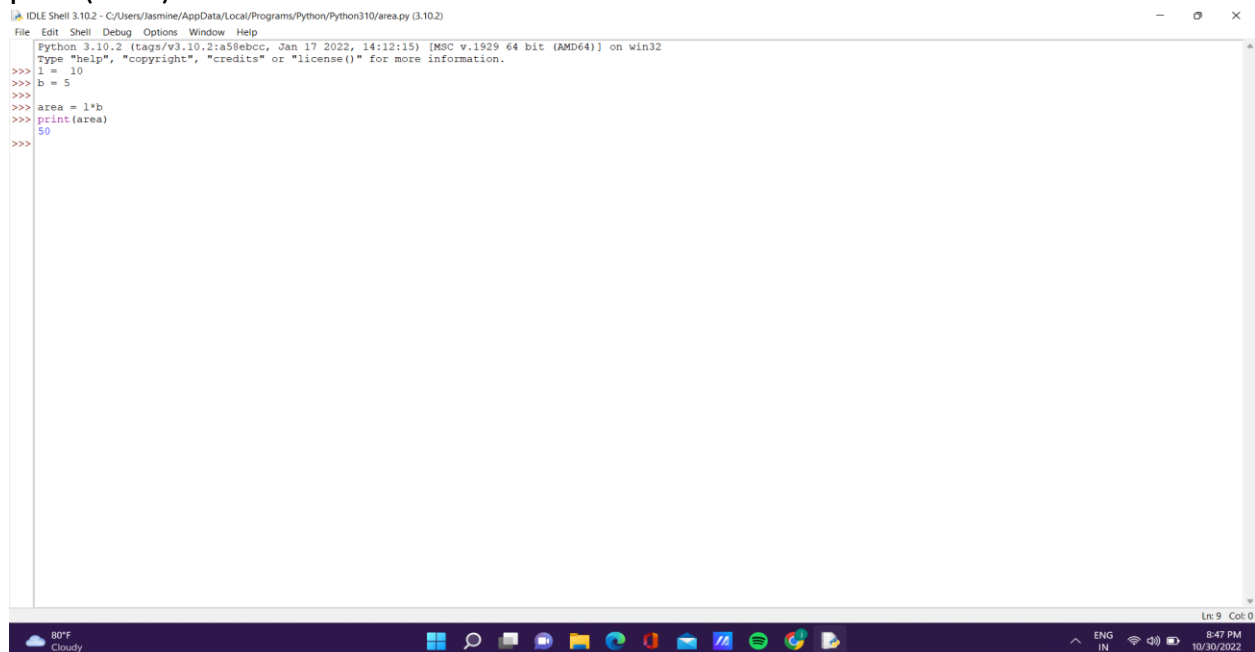

SCRIPT:

l = 10

b = 5

area = l*b

print(area)

The screenshot shows the IDLE Shell interface for Python 3.10.2. The script is executed in the Shell, and the output is displayed. The script defines variables l and b, calculates the area, and prints the result.

```
Python 3.10.2 (tags/v3.10.2:a58ebcc, Jan 17 2022, 14:12:15) [MSC v.1929 64 bit (AMD64)] on win32
Type "help", "copyright", "credits" or "license()" for more information.
>>> l = 10
>>> b = 5
>>> area = l*b
>>> print(area)
50
>>>
```

The taskbar at the bottom shows the system clock as 8:47 PM on 10/30/2022, and the weather as 80°F Cloudy.
